

1. **Frontend (Next.js + Tailwind CSS):** Handles the user interface and responsive design.
2. **Backend (Next.js API Routes):** Manages the server-side logic and API endpoints.
3. **Authentication (NextAuth.js):** Provides secure user authentication and session management.
4. **Database (MongoDB Atlas):** Stores user data, products, orders, and other records.
5. **Hosting (Vercel):** Ensures fast and reliable deployment of the platform.
6. **Admin Panel (Dashboard):** Allows administrators to manage products, users, and orders efficiently.
